

Assurance Risk Managers Retirement Strategies **Will Knock Your Socks Off!**

ARM wants to help you protect everything that you have worked hard to accumulate. Let us show you some of the most innovative strategies that can literally **change the look of your retirement years.**

Risks not only exist in running a business. There are many risks in retirement that you have to account for:

- Q:** Will you have enough retirement income?
- Q:** Will you outlive your money?
- Q:** Will your spouse or children thrive if you died?
- Q:** Will your grandchildren be able to afford college?
- Q:** Will you need some form of long term care?

Most people spend more time planning a vacation than they spend planning their retirement. Don't be one of "those" people!
